

CLIENTS SOCIALLY INTEGRATED

Clients Socially Integrated is a community-based day program for adults with disabilities focused on learning transferable skills that lead to independence in the community. This is achieved by spending the day out in the community, learning to navigate the public transportation system, relationship building, problem solving and deciding as a group what activities to do.

Communication, safety, transportation and valuable life skills are improved and encouraged as clients participate in their local community through varying activity options.

CSI serves adults who are diagnosed with a developmental and/or intellectual disability. Clients must have transportation to our meeting point in Polk County.

Clients Socially Integrated has allowed Ted to be a part of the community. His smile and sense of humor have an impact on everyone he meets. He enjoys bowling, getting ice cream and riding the city bus with the Clients Socially Integrated group. Ted has also discovered a passion for volunteering, which supports him in the process of obtaining employment one day, something he had not considered before.
